

CROWD CONTROL BARRIER

Our steel Crowd Control barriers feature dual interlocking hinge points, making them sturdy and durable.

Product Description

Fortress fencing steel crowd control barriers are one of the only barricades on the market that feature dual interlocking hinge points, making them the sturdiest and ideal choice of barrier.

Our fast mounting, interlocking system makes installation a breeze and our panels also offer removable feet, once the feet are removed stacking and storing panels is simple. Low intrusion flat feet prevent trip hazards, come with pre-drilled holes for bolt-down installations and will ensure you meet OH&S requirements, whilst providing maximum safety to workers and pedestrians.

Available in 2 fully welded finishes, galvanised steel silver barrier and highly visible orange powder-coated steel barrier. Feet also available separately for purchase.

Features & Benefits

- Effortless Setup and Storage
- Maximum Visibility
- Professional Branding
- Superior Stability
- Long Lasting Durability
- Compliance and Safety
