

WORKZONE BARRIER

WorkZone Barriers are ideal for creating exclusion zones around road works, maintenance areas and work zones.

Stable and Highly Visible:

The Fortress Fencing® Workzone Barrier consists of a tough single piece thermoplastic frame fitted with self-weighted feet that rotate for storage and transport. The system is modular and each panel links together easily with a moulded pin and lock system. In bright safety orange, it is an effective barrier to demarcate no-go zones.

Weighing just over 15 kg, each panel is manageable by one person and the Workzone Barrier is easy to set up and dismantle. Each panel measures 2000mm long x 1000 mm high and is moulded from safety orange plastic with a red and white strip across the top for extra visibility.

The Workzone Barrier is approved to NZTA Standards.

Features & Benefits:

- 2m long x 1m high
- Weighs 15.2kg
- Easy snap in locking system
- High visibility Orange moulded plastic
- Black folding feet designed for easy storage when lying flat or stacked against a wall
- Weighted feet for added stability
- Approved to NZTA standards
